

Configuration (STUB)

Placeholder — replace with real configuration reference content.

development · 2026-11-08

Configuration

STUB — TO BE REPLACED. This is placeholder content for the ozwala documentation site.

This page will eventually document the available configuration options, their defaults, and where they live (config file, environment variables, UI settings).

What belongs here (eventually)

- A full reference table of configuration keys, types, and defaults.
- Where configuration is loaded from and the precedence order.
- Example configurations for common setups.
